DETAILED FEATURES

Comprehensive POS Functions

Precise POS offers comprehensive point-of-sale functionality including Product and Customer Management, Cash and Account Sales, Returns, Exchanges, Lay-By (Layaway), Quotes, Orders, Account Payments, Cash Out and Paid Outs.

Interoperability with Epicor

- All products, customers, pricing and other POS related data configured in Epicor is available in-store
- Complete transaction audit trail from point-of-sale through to General Ledger
- Advanced data signing techniques ensure complete data integrity between store and central office

Know Your Customers

- Create and manage customer accounts at POS
- On-account sales with AR credit checking
- Global drill down to account details
- Enforce specific business rules by Customer Type
- Automatically apply trade discounts for customers

Simple, Clean User Interface

- Intuitive keyboard/mouse or keyboard only driven interface, for fast data entry
- Define 'feel' using configurable station layout templates
- Apply your organization's corporate look with UI skinning

Quick and Easy Product Selection

- Quickly and easily scan, type or search for product codes
- Powerful searching using simple criteria, inventory fast keys and intuitive push-button-drilldown methods
- Context sensitive search-in-search and cross-searching
- Enquire on and sell products across your locations
- Define multiple codes for a single product; Supplier barcode, EAN, UPC etc
- Suggested cross-sell and up-sell products

Ensure the Integrity of Your Product Pricing

- All list, promotional and special pricing defined in Epicor is available at point-of-sale
- Full support for multi-tiered inclusive, exclusive and exempt tax codes
- Audited line level manual price and manual discounting with authorization limits

Flexible, Convenient Tendering Options

- Configurable hot-keys for payment method selection
- Multiple, split tendering options
- Electronic integration to EFTPOS terminals
- Full support for Store Credits and Gift Vouchers

Printing Forms and Reports

- Full support for local and network based printing
- Print server rules determine what should print, when and where
- Crystal reports allows full access to create your own or modify standard forms and reports
- Reprint feature allows all or selected associated documents to be reprinted

Shift Management

- Convenient shift based auditing
- Shift and till totals printed direct from POS Station
- Cash drawer Reconciliation wizard
- Generation of Cash Management transactions simplifies Bank Reconciliation
- Open Shift
- Cash drops and denomination tracking

Centralized Management and Configuration

- Centrally configure and manage POS across the entire enterprise
- Conveniently connect directly into store systems from a single application on your desktop
- System wide visibility of log files with automatic email notification options
- Enter and control stock counts at store level, directly or via handheld devices
- User defined fields

Granular Security and Authorizations

- User and Group based security model, with granular functional permissions
- Define authorizations and overrides for Price Changes, Discounts Given, Credit Limits, Gross Profit, Minimum Price, Returns and Store Credits
- Grant or revoke user access to store locations from a single, central point

Scalable Deployment Options

- Deploy across multiple locations quickly and easily
- Designed to scale from single station to large multi-station stores
- Offline capability removes reliance on head-office connection, ensuring high availability in-store
- Support for remote users is ideal for trade shows, conferences or a traveling sales force
- Centralize administration and automate arms-length transactions across group/franchises using Multi-Company Services (MCS).

Outperform Your Competition
